

ASC CARES

Cultivate and Renew Employable Skills

Dear Friends,

At the heart of American Safety Council is a mission to make people's lives safer and more rewarding through customer-centric, effective and innovative online training solutions. But at the end of the day, we understand that our training is more than a checkmark on a 'to-do' list – it's about moving forward.

ASC CARES was created to make online training easily accessible for businesses who have made it their mission to support those who need assistance moving forward. By minimizing the barriers that stand between struggle and success, ASC CARES is strategically designed to create opportunities that will allow people to **C**ultivate **a**nd **R**enew **E**mployable **S**kills.

Our e-learning courses help pave the way for what's next – whether it be a young student earning their first driver's permit or a job applicant seeking an OSHA wallet card to further their career, quality e-learning helps to build a bridge from where we are to where we want to be.

American Safety Council believes that every job seeker deserves access to training that will help build a brighter future not only for themselves but also their families and local communities. Through ASC CARES, we are excited to work with organizations across the country to provide a program that makes e-learning a viable option both financially and logistically.

Together, we can create opportunities for success through education and training. Always striving to better ourselves – always helping one another move forward.

On behalf of our team of 100+ at ASC, thank you for the privilege of being part of your journey.

Sincerely,

John Comly
